Internship guidelines:

In this so-called "phase 2" the Government and the Ministry authorized the carrying out of the internship activities in both modalities: in-person and mixed.

The University has authorized the carry-out of internships in-person modality "on condition that the organization of spaces and work minimize the risk of proximity and aggregation and that the organizational measures of prevention and protection are adopted" (DM n. 58/2020).

A fundamental prerequisite is that the academic tutor gives consent and that the trainee agrees by signing the consent form for the internship and that there is the possibility to carry out the internship in-person.

The mixed mode (with hours both in-person and remotely) can be useful in those situations where for safety reasons it is not possible to accommodate a trainee for all the necessary hours. The division of hours in attendance and hours at a distance must be agreed upon with the institution/entity, while still allowing some flexibility to adapt to the evolution of the situation.

It is still possible to carry out the internship completely remotely at those entities and structures that allow it.

Internship at the laboratory of UNIMORE: project activities
https://www.ingmo.unimore.it/site/home/didattica/articolo880046080.html

The curricular internships in preparation for thesis in a Unimore laboratory require, in addition to the consent of the tutor and the trainee, also that of the director of the department responsible for the structure where the laboratory is located.

Access to the laboratory will take place in the times and ways established by the structure and the request for access must be submitted by the tutor teacher.

The authorizations produced must be kept by the tutor teacher and, in copy, by the trainee.

Internships at external entities: curricular internships in companies
https://www.ingmo.unimore.it/site/home/didattica/articolo880036811.html

Internships at external entities require, in addition to the consent of the tutor and the trainee, also that of the host external entity. Additionally, the host entity must produce a declaration of compliance with current regulations (national, regional and local) regarding COVID security and safety. External entities must also guarantee the availability of the necessary protective devices to the trainee. The declaration also exempts the university from any liability arising from total or partial non-compliance with the rules.

The declarations must be uploaded to the internship platform respectively by the trainee and the company/entity.

The external entities must also explain to the trainee the measures taken on COVID security and safety.
