

Meet the companies

Wednesday May, 14th, 2025, h16, Lab M0.2

ResilTech is an ICT consultancy company operating in the field of safety and security critical systems. The company integrates industrial competences with research and development skills coming from the many years experience of its staff in national and international projects.

Resiltech provides SW Self Test libraries (STL) solution for ARM/MIPS/ RiscV-based microcontrollers, CPU and Application Cores fully compliant with ISO26262 Automotive standard.

During the meeting ISO26262 life cycles requirements for critical HW/SW development will be discussed with practical reference to the STL products verification and validation activities..

This is part of «Progetto del Software LT» course by Prof. Paolo Burgio.
